

**FOTOFETTER**

**TYPE FACES**

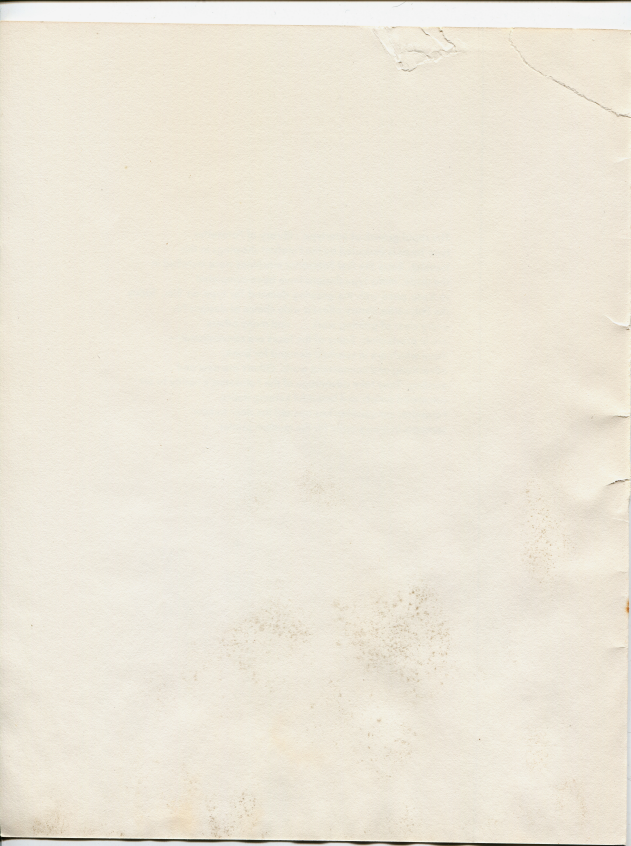

INTERTYPE CORPORATION • BROOKLYN 1, NEW YORK

The rapid growth of Intertype's library of Fotosetter type faces is indicated by the Fotofont showings in this booklet. Since the first Fotosetter machines were installed in the trade, many type designs have been completed to keep pace with the growing demand for type on film. Today the Fotosetter library offers a wide choice of designs for every class of printing work . . . and many others are in production. Some of the faces are conventional—those which are in constant demand for book, advertising and commercial work. Others are new and exciting. They take advantage of the Fotosetter's ability to set connected scripts and beautiful kerning italics. Fotosetter composition has opened the door to new concepts in typography for the modern printer.
